

Planning for an Effective Intercultural/International (Virtual) Exchange

Seven collaborators, representing six countries

The Goals

- ✓ Further develop **our** understanding of global competence as **Teacher Educators**;
- ✓ Identify promising practices that allow for the development of the global competence of **Teacher Trainees** through an international/intercultural experience, whether through travel to another country, through virtual means, or through work that involves international/intercultural exchange within their own communities;
- Collaborate in planning and implementing a virtual exchange involving **Teacher Educators and Teacher Trainees (STILL IN PROGRESS)**

The Output

An e-book, created on *Book Creator*®, describing the process of the collaborating authors, sharing resources, research and reflections as we move towards implementing our virtual exchange.
